## EDUCATION

### Memorial University

St. John's, NL

*Bachelor of Engineering in Computer Engineering*

*Sep. 2021 – May 2026*

- **Interest:** Robotics, Control Systems, Machine Learning, Data-protection/Cyber-security
- **Honors & Awards:** Wilfred & Rose Davis Scholarship, 2021

## EXPERIENCE

### Software Developer | Co-op

May 2024 – Present

*Jeddah International School*

*Jeddah, Saudi Arabia*

- Collaborating to create a dashboard web application to conduct reports and analysis on student and teacher data.
- Developing comprehensive reports on website issues and design considerations, and implemented code solutions to address identified problems.
- Debugging and troubleshooting computer hardware and software, involving network server environments.

### Software Engineer | Co-op

Sep. 2023 – Jan. 2024

*NL Eats*

*St. John's, NL*

- Collaborated and led a team to develop the NL Eats Hydroponic mobile app using **MongoDB**, and **Javascript**
- Designed and launched **2** dynamic websites, using **Figma** and **JavaScript**, to raise awareness about food insecurity by **20%**
- Conducted analysis on streamline connection between hydroponic systems and servers, improving latency by **30%**

## CERTIFICATIONS

**Computer Hardware** - Cisco, 2024

**React - The Complete Guide (incl. React Router & Redux)** - Udemy, 2023

**Onshape Fundamentals: CAD** - Onshape, 2022

## TECHNICAL SKILLS

**Languages:** Java, Python, C/C++, C#, MongoDB, JavaScript, Typescript, VHDL

**Technologies:** React.js, React Native, Express.js, NodeJS, Flask, Firebase, Tailwind CSS, JavaFX

**Developer Tools:** VS Code, IntelliJ, AWS, Solidworks, AutoCAD, Simulink, PSpice, Git, Microsoft Azure, Matlab

**SoftSkills:** Communication, Critical Thinking, Time Management, Adaptability, Team Player, Attention to Detail

## PROJECTS

**NL Eats Hydroponic** | *Arduino UNO, React Native, Express.js, Microsoft Azure*

Sep. 2023 – Dec. 2023

<https://github.com/neillouis3/NLEats-Hydroponics>

- Engineered a **full-stack mobile application** for managing hydroponic systems, with real-time data processing
- Implemented **React Native**, and **Express.js** serving as REST API for a **Microsoft Azure** backend, with support for over **20** different species of plants
- Incorporated **Microsoft Azure** to establish a streamline live connection from an Arduino UNO system to a **MongoDB** database in **C**

**Tic-Tac-Legends** | *React Native, Express.js, Firebase, MongoDB*

Nov. 2023 – Present

<https://github.com/neillouis3/Tic-Tac-Legends>

- Developed and launched a mobile game an that revolutionizes Tic-Tac-Toe with power-ups and mini-games, available on the Apple Store.
- Utilized **React Native** for building a user-friendly and engaging application and used **Python** for a fast back-end computation and game engine.

**Webpage** | *NextJS, Typescript, Python, MySQL*

Dec. 2023 – Present

<https://jchekim.vercel.app/>

- Designed and built a user-friendly full-stack website using **NextJS**
- Leveraged **Flask** as Rest API alongside MySQL database, resulting in a fast and secure data management.
